ROBO RUMBLE

General Rules (All Events) :

- Participants must use components (motors, batteries, Arduino, jumpers, etc.) that are mentioned to maintain fairness and prevent any unfair advantages.
- The bot must be wirelessly controlled.
- Power components must be safe and official.
- Fouls (unsafe modifications, damaging arena, intentionally leaving arena, or damaging opponents) → disqualification.
- Referee decisions are final in all cases.
- Note : Point systems for events are subject to change at the discretion of the organizers

List of Components :

- Arduino UNO / Nano / ESP 32 x1
- Motor drivers (L298N)
- BO motors (max 4) + wheels
- Bluetooth HC05 Module x1 (if required)
- 18650 3.7v Li-ion battery Max 4
- Chasis (metal not allowed)
- Dimensions – maximum allowed 18cm x 18cm + 5% tolerance
- Weight – maximum allowed 800gm + 5% tolerance

ROBO RUMBLE

Event 1 (Bot Pursuit):

- Arena & Match Duration - Starts at 2m × 2m. - Match duration: 5 minutes \
- Inning 1(2.5min) → one bot is the chaser, the other is the runner.
- Inning 2(2.5min) → roles are reversed. - Starting roles decided by a coin toss.
- Scoring : Tag in 2x2 m → 10 points
- Winner - Decided by total points. - If bots collide and get stuck, the referee may pause and reset positions. - If no tag occurs in 3 minutes, a Sudden Death round happens in a 1m × 1m arena for 1 minute only. - If still no tag → match is declared a draw.
- Additional Note - The actual arena design with obstacles will be revealed on the day of the event.

Event 2 (Robo Sumo):

- 1 vs 1 knockout round.
- The arena size will be declared during the event.
- Two bots start inside the arena. The goal is to push the opponent out
- Each match is best of 3 rounds
- Each round will be of 1:30 min.
- A round is won when one bot forces the other completely out
- If neither bot goes out within the announced time, judges decide the winner based on performance
