ROBO SOCCER

Aim :

Build a manually controlled robot capable of competing in a one-on-one game of soccer.

Team Specification :

A team will consist of only 3 to 4 members, each team must have unique members. Teams having same members will be disqualified. Not more than 2 members of a team can control the bot at any given time.

Gameplay :

A face of between 2 bots to score goals at the opposite end goal, with 1.5 minute half and 1 minute break.

ROBO SOCCER

Arena Specifications:

- Dimensions: 243 cm x 122 cm x 19cm
- Goal Post: 50 cm x 10cm
- Floor: Stainless Steel
- A single plastic ball will be used.

Bot Allowance:

- Bot Dimensions: 30 cm x 25cm
- Voltage Limit : 12V
- Bot can be Wired or wireless.
- Max Weight: 3kg (excluding batteries)
- 5% tolerance allowed on dimensions and weight.
- Battery should be mounted on the bot.
- Any weapon is not allowed.

ROBO SOCCER

Gameplay Rules:

- The match will be of 3 mins with 1.5 mins halves each and 1 minute half time break.
- During the gameplay, a cumulative 1 minute of technical timeout can be taken for each half. After technical timeout, the position of the bot should be same as before the timeout.
- A participant's bot is not supposed to interact directly with the opponent's bot when it is not in possession of the ball. To gather the ball from the opponent intention must be to attack only the ball.
- Physical interaction between the bots in this process will be tolerated if it is judged that the attacking bot went for the ball.
- If the ball goes out of arena, then the game will restart i.e. the ball will be placed at center and the bots will be positioned as initial.
- In case of tie, a tie breaker round of 1 min will be played and even if tie breaker ends in a tie, then the team with the higher ball possession wins the game.
- Any damage to the arena will lead to automatic disqualification.
- In case of discrepancy, the decision of the event coordinators will be final and binding.
